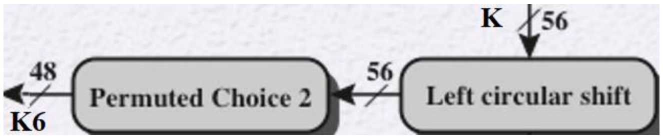
Quiz: Data Encryption Standard Name ______________________________ NetID _______

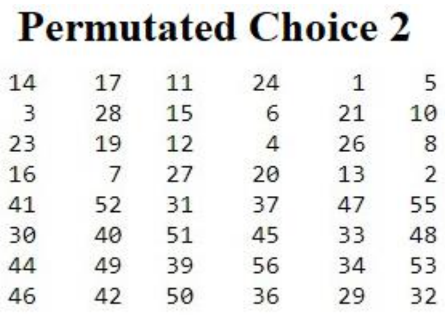
a. During the encryption process for using DES algorithm, assume in round 7, we get the following data as entry into the S-boxes (the format is in HEX): 2A0B3A14D815. Find the output of the S-box stage as a 32-bit data converted to HEX format. Show your work.

Final Answer (in HEX):

b. In the key generating process of DES algorithm, if K is given as (the format is in HEX): 3E2F0136224781. Find the subkey K6 as shown in the pic below (show it in HEX). Show your work.

Final Answer (in HEX):





Permutated Choice 2
